Our whitening treatment at Holly House gives great results for a whiter, brighter and confident smile.

HOW DOES TEETH WHITENING WORK?

First, a custom tray is made which fits snugly over your teeth. This will be filled with a whitening agent which will work to gradually lighten teeth. You will use this for a few hours at home every day until you have achieved the level of whiteness that you want. This is usually seen over three weeks or so.

WHY CHOOSE TEETH WHITENING?

Over time teeth become stained and discoloured as the result of consuming beverages such as tea, coffee, and red wine, or smoking. Discolouration is also a normal part of our teeth ageing.

You may not notice it at first but as you get older tooth discolouration becomes more obvious, leaving you feeling that you look older than you are. This can lead to a loss of confidence and can quickly affect how you see yourself in social or work situations.

HOW LONG DO THE RESULTS LAST?

This depends on a variety of factors including how well you look after your teeth and how well you can avoid foods and drinks which will stain your teeth again.

Generally though, the results from our professional tooth whitening treatment can last up to about 2 years. However with your custom-made trays, a top-up can be applied at set intervals, or before special occasions for that added sparkle!
